

ABSTRACT AMENDMENTS

Please delete the Abstract in its entirety and replace the Abstract as follows:

A control system includes a control apparatus and a remote control device. The control apparatus receives an operation panel from a controlled apparatus. The operation panel includes display elements used to control the controlled apparatus. The display elements include a specific display element used to control a specific function of the controlled apparatus. The remote control device has first and second operating units. The first operating unit is used to control the specific function of the controlled apparatus using the operation panel. The second operating unit is used to control the specific function of the controlled apparatus. The control apparatus receives a control signal from the remote control device, and generates one of a first command and a second command in accordance with the control signal. The first and second commands are used to control the specific function of the controlled apparatus.
